

Wireless & FREE. TOTALLY.

For the **FIRST TIME EVER**, Total Merchant Services is giving away the Nurit 8000 GPRS wireless unit **FOR FREE!**

As you may know, wireless credit card processing sounds great, but had both “service” and “price” issues in the past.

However, the new GPRS service option solved the “service” problem, since it actually works – reliably – **everywhere your cell phone does**. Next, there were legitimate “price” concerns as wireless terminals were being sold for \$1,000-\$2,000, or leased for \$49-\$99 per month – on 48 month leases!

So, Total Merchant Services decided, once and for all, to solve both the “service” and “price” issues by offering you **THE REAL THING – the new Nurit 8000 GPRS Secure terminal – for FREE!**

The Nurit 8000 is not some clumsy-looking BlackBerry or cell phone with a mag strip and a separate printer. **It's the total package!** And, in addition to cutting the cord out of the process, the Nurit 8000 cuts the transaction speed down to **just 2-3 seconds**, as opposed to the slow 10-15 seconds that dial up terminals can make you wait.

So, what's the catch? There is none.

There are no additional processing costs when taking advantage of this fantastic offer. No hassles—When we say, “**No catches,**” that's exactly what we mean.

It's truly free, truly wireless, and truly works!

FREE!
